

# HIGHLAND HIGH SCHOOL

Students observed the sun through a solar viewer, a white light filtered telescope, and an H-alpha filtered telescope.

STEM activities: *Importance of Color & Health Effects of the Sun.*

"Roger, Thank you and Linda and Anthony so much for coming out! The kids had nothing but positive feedback about the scopes, tables and the activities you brought!...In short, as excited as were to have you come, it turned out even better than we could have hoped for. You are all just incredible!"

Chris Tucker , Physics/Geo/Astro Teacher
